

Recombinant Human TFCEP2 Protein, GST/His-tagged

Cat. No. TFCEP2-648H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human TFCEP2 protein, fused to GST tag at N-terminus and His tag at C-terminus, was expressed in Insect cell.
Species	Human
Source	Insect Cells
Description	This gene encodes a transcription factor that binds the alpha-globin promoter and activates transcription of the alpha-globin gene. The encoded protein regulates erythroid gene expression, plays a role in the transcriptional switch of globin gene promoters, and it activates many other cellular and viral gene promoters. The gene product interacts with certain inflammatory response factors, and polymorphisms of this gene may be involved in the pathogenesis of Alzheimer's disease. [provided by RefSeq, Mar 2010]
