

## Recombinant Human ICOSLG Protein, MYC/DDK-tagged

Cat. No. ICOSLG-794H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                |
|------------------|------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human ICOSLG protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                          |
| Source           | HEK293                                                                                         |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                         |
| Molecular Mass   | 33.2 kDa                                                                                       |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                    |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                               |

### GENE INFORMATION

|                 |                                                               |
|-----------------|---------------------------------------------------------------|
| Gene Name       | inducible T-cell costimulator ligand[ Homo sapiens ]          |
| Official Symbol | ICOSLG                                                        |
| Synonyms        | B7-H2; B7H2; B7RP-1; B7RP1; CD275; GL50; ICOS-L; ICOSL; LICOS |
| Gene ID         | 23308                                                         |
