

Recombinant Human UTP14A Protein, DDK-tagged

Cat. No. UTP14A-820H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human UTP14A protein, fused to DDK tag at C-terminus, was expressed in Insect cell.
Species	Human
Source	Insect Cells
Description	This gene encodes a member of the uridine triphosphate 14 family. As an essential component of a large ribonucleoprotein complex bound to the U3 small nucleolar RNA, the encoded protein is involved in ribosome biogenesis and 18S rRNA synthesis. An autosomal retrotransposed copy of this X-linked gene exists on chromosome 13. Alternative splicing results in multiple transcript variants.[provided by RefSeq, Oct 2009].
Form	50 mM Tris.HCl, pH 8.0, 100 mM glycine, 10 % glycerol.
Molecular Mass	87.8 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Concentration	>50 ug/mL as determined by microplate BCA method

GENE INFORMATION

Gene Name	UTP14A, small subunit processome component[Homo sapiens]
