

## Recombinant Human HABP4 Protein, MYC/DDK-tagged

Cat. No. HABP4-832H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                               |
|------------------|-----------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human HABP4 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                         |
| Source           | HEK293                                                                                        |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                        |
| Molecular Mass   | 45.6 kDa                                                                                      |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                   |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                              |

### GENE INFORMATION

|                 |                                              |
|-----------------|----------------------------------------------|
| Gene Name       | hyaluronan binding protein 4[ Homo sapiens ] |
| Official Symbol | HABP4                                        |
| Synonyms        | IHABP-4; IHABP4; Ki-1/57; SERBP1L            |
| Gene ID         | 22927                                        |
