

## Recombinant Human KRBA2 Protein, His-tagged

**Cat. No.** KRBA2-887H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human KRBA2 protein, fused to His tag at N-terminus, was expressed in E. coli. |
| <b>Species</b>          | Human                                                                                      |
| <b>Source</b>           | E.coli                                                                                     |
| <b>Form</b>             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10 % glycerol, 1 % Sarkosyl.                              |
| <b>Molecular Mass</b>   | 56 kDa                                                                                     |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                           |

### GENE INFORMATION

|                        |                                                                            |
|------------------------|----------------------------------------------------------------------------|
| <b>Gene Name</b>       | KRAB-A domain containing 2[ Homo sapiens ]                                 |
| <b>Official Symbol</b> | KRBA2                                                                      |
| <b>Synonyms</b>        | KRAB A domain containing 2; OTTHUMP00000163762; KRAB-A domain containing 2 |
| <b>Gene ID</b>         | 124751                                                                     |
