

## Recombinant Human METTL26 Protein, MYC/DDK-tagged

Cat. No. METTL26-942H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                 |
|------------------|-------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human METTL26 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                           |
| Source           | HEK293                                                                                          |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                          |
| Molecular Mass   | 11.8 kDa                                                                                        |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                     |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                |

### GENE INFORMATION

|                 |                                          |
|-----------------|------------------------------------------|
| Gene Name       | methytransferase like 26[ Homo sapiens ] |
| Official Symbol | METTL26                                  |
| Synonyms        | C16orf13; JFP2                           |
| Gene ID         | 84326                                    |
