

## Recombinant Human DAB2IP Protein, MYC/DDK-tagged

Cat. No. DAB2IP-988H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                                                                                               |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human DAB2IP protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293.                                                                                                                                                |
| Species          | Human                                                                                                                                                                                                                                         |
| Source           | HEK293                                                                                                                                                                                                                                        |
| Description      | DAB2IP is a Ras (MIM 190020) GTPase-activating protein (GAP) that acts as a tumor suppressor. The DAB2IP gene is inactivated by methylation in prostate and breast cancers (Yano et al., 2005 [PubMed 15386433]).[supplied by OMIM, May 2010] |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                                                                                                                                                                        |
| Molecular Mass   | 124.9 kDa                                                                                                                                                                                                                                     |
| Purity           | >50 ug/mL as determined by microplate BCA method                                                                                                                                                                                              |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                                                                                                                                                              |

### GENE INFORMATION

|                 |                                                  |
|-----------------|--------------------------------------------------|
| Gene Name       | DAB2IP DAB2 interacting protein [ Homo sapiens ] |
| Official Symbol | DAB2IP                                           |
