

Recombinant Human SERPINI2 Protein, MYC/DDK-tagged

Cat. No. SERPINI2-997H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human SERPINI2 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293.
Species	Human
Source	HEK293
Description	The gene encodes a member of a family of proteins that acts as inhibitors of serine proteases. These proteins function in the regulation of a variety of physiological processes, including coagulation, fibrinolysis, development, malignancy, and inflammation. Expression of the encoded protein may be downregulated during pancreatic carcinogenesis. Alternative splicing results in multiple transcript variants for this gene. [provided by RefSeq, Jan 2013].
