

## Recombinant Human TIAM1 Protein, MYC/DDK-tagged

Cat. No. TIAM1-1039H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                               |
|------------------|-----------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human TIAM1 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                         |
| Source           | HEK293                                                                                        |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                        |
| Molecular Mass   | 177.3 kDa                                                                                     |
| Purity           | >50 ug/mL as determined by microplate BCA method                                              |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                              |

### GENE INFORMATION

|                 |                                                                  |
|-----------------|------------------------------------------------------------------|
| Gene Name       | TIAM1 T-cell lymphoma invasion and metastasis 1 [ Homo sapiens ] |
| Official Symbol | TIAM1                                                            |
| Synonyms        | FLJ36302                                                         |
| Gene ID         | 7074                                                             |
