Recombinant Human LTBP3 Protein, MYC/DDK-tagged

Cat. No. LTBP3-1222H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human LTBP3 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293.
Species	Human
Source	HEK293
Description	The protein encoded by this gene forms a complex with transforming growth factor beta (TGF-beta) proteins and may be involved in their subcellular localization. Activation of this complex requires removal of the encoded binding protein. This protein also may play a structural role in the extracellular matrix. Three transcript variants encoding different isoforms have been found for this gene.[provided by RefSeq, Jan 2010].
Form	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Molecular Mass	135.2 kDa
Purity	>50 ug/mL as determined by microplate BCA method
Concentration	>50 ug/mL as determined by microplate BCA method

GENE INFORMATION

Gene Name	latent transforming growth factor beta binding protein 3 [Homo sapiens]

Tel: 1-631-559-9269 1-516-512-3133
Email: info@creative-biomart.com Fax: 1-631-938-8127
45-1 Ramsey Road, Shirley, NY 11967, USA

Official Symbol	LTBP3
Synonyms	DASS; LTBP-3; LTBP2; pp6425; STHAG6
Gene ID	4054
mRNA Refseq	NM_021070.4
Protein Refseq	NP_066548.2
MIM	602090
UniProt ID	Q8WYU6
