

Recombinant Human MFRP Protein, MYC/DDK-tagged

Cat. No. MFRP-1249H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human MFRP protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293.
Species	Human
Source	HEK293
Description	This gene encodes a member of the frizzled-related protein family. The encoded protein plays an important role in eye development and mutations in this gene have been associated with nanophthalmos, posterior microphthalmia, retinitis pigmentosa, foveoschisis, and optic disc drusen. The protein is encoded by a bicistronic transcript which also encodes C1q and tumor necrosis factor related protein 5 (C1QTNF5). [provided by RefSeq, Jun 2013]
Form	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Molecular Mass	62 kDa
Purity	>50 ug/mL as determined by microplate BCA method
Concentration	>50 ug/mL as determined by microplate BCA method

GENE INFORMATION

Gene Name	MFRP membrane frizzled-related protein [Homo sapiens]
-----------	---

 Tel: 1-631-559-9269 1-516-512-3133

 45-1 Ramsey Road, Shirley, NY 11967, USA

Official Symbol	MFRP
Synonyms	MCOP5; NNO2; RD6
Gene ID	83552
mRNA Refseq	NM_031433
Protein Refseq	NP_113621
MIM	606227
UniProt ID	Q9BY79
