

## Recombinant Human C12orf42 Protein, His-tagged

**Cat. No.** C12orf42-1270H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human C12orf42 protein, fused to His tag at N-terminus, was expressed in E. coli. |
| <b>Species</b>          | Human                                                                                         |
| <b>Source</b>           | E.coli                                                                                        |
| <b>Form</b>             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10 % glycerol, 1 % Sarkosyl.                                 |
| <b>Molecular Mass</b>   | 39.6 kDa                                                                                      |
| <b>Purity</b>           | >50 ug/mL as determined by microplate BCA method                                              |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                              |

### GENE INFORMATION

|                        |                                                               |
|------------------------|---------------------------------------------------------------|
| <b>Gene Name</b>       | C12orf42 chromosome 12 open reading frame 42 [ Homo sapiens ] |
| <b>Official Symbol</b> | C12orf42                                                      |
| <b>Synonyms</b>        | FLJ25323; MGC43592; MGC57409                                  |
| <b>Gene ID</b>         | 374470                                                        |
