

## Recombinant Human FAM166A Protein, MYC/DDK-tagged

Cat. No. FAM166A-1301H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                 |
|------------------|-------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human FAM166A protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                           |
| Source           | HEK293                                                                                          |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                          |
| Molecular Mass   | 36 kDa                                                                                          |
| Purity           | >50 ug/mL as determined by microplate BCA method                                                |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                |

### GENE INFORMATION

|                 |                                                                        |
|-----------------|------------------------------------------------------------------------|
| Gene Name       | FAM166A family with sequence similarity 166, member A [ Homo sapiens ] |
| Official Symbol | FAM166A                                                                |
| Synonyms        | HSD46; HSD46                                                           |
| Gene ID         | 401565                                                                 |
