

## Recombinant Human GATSL1 Protein, MYC/DDK-tagged

Cat. No. GATSL1-1325H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                |
|------------------|------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human GATSL1 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                          |
| Source           | HEK293                                                                                         |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                         |
| Molecular Mass   | 35.9 kDa                                                                                       |
| Purity           | >50 ug/mL as determined by microplate BCA method                                               |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                               |

### GENE INFORMATION

|                 |                                      |
|-----------------|--------------------------------------|
| Gene Name       | GATS protein-like 1 [ Homo sapiens ] |
| Official Symbol | GATSL1                               |
| Synonyms        | GATS-like protein 1                  |
| Gene ID         | 389523                               |
