

## Recombinant Human RIPPLY3 Protein, MYC/DDK-tagged

**Cat. No.** RIPPLY3-1346H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                 |
|-------------------------|-------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human RIPPLY3 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| <b>Species</b>          | Human                                                                                           |
| <b>Source</b>           | HEK293                                                                                          |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                          |
| <b>Molecular Mass</b>   | 20.2 kDa                                                                                        |
| <b>Purity</b>           | >50 ug/mL as determined by microplate BCA method                                                |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                |

### GENE INFORMATION

|                        |                                                     |
|------------------------|-----------------------------------------------------|
| <b>Gene Name</b>       | rippl3 transcriptional repressor 3 [ Homo sapiens ] |
| <b>Official Symbol</b> | RIPPLY3                                             |
| <b>Synonyms</b>        | DSCR6; DSCR6                                        |
| <b>Gene ID</b>         | 53820                                               |
