

## Recombinant Human MIER2 Protein, GST/His-tagged

Cat. No. MIER2-1356H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                      |
|------------------|----------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human MIER2 protein, fused to GST tag at N-terminus and His tag at C-terminus, was expressed in E. coli. |
| Species          | Human                                                                                                                |
| Source           | E.coli                                                                                                               |
| Form             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10 % glycerol, 1 % Sarkosyl.                                                        |
| Molecular Mass   | 85.8 kDa                                                                                                             |
| Purity           | >50 ug/mL as determined by microplate BCA method                                                                     |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                                     |

### GENE INFORMATION

|                 |                                                                             |
|-----------------|-----------------------------------------------------------------------------|
| Gene Name       | MIER2 mesoderm induction early response 1, family member 2 [ Homo sapiens ] |
| Official Symbol | MIER2                                                                       |
| Synonyms        | KIAA1193; Mi-er2                                                            |
| Gene ID         | 54531                                                                       |
