

## Recombinant Mouse Cflar protein, His & T7-tagged

**Cat. No.** Cflar-1831M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Mouse Cflar aa. (Asn210~Gly460 (Accession # O35732)) fused with N-terminal His & T7 tag was produced in E. coli cells.                                                                                                                                                                                                  |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                                                                               |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                              |
| <b>ProteinLength</b>    | Asn210~Gly460                                                                                                                                                                                                                                                                                                                       |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                                                                                                                                                                                 |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 32.3kDa                                                                                                                                                                                                                                                                                                   |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                                                                                                                                                                       |
| <b>Purity</b>           | >95%                                                                                                                                                                                                                                                                                                                                |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP.                                                                                                                                                                                                                                                                                                            |
| <b>Stability</b>        | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition. |
| <b>Storage</b>          | Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at                                                                                                                                                                                                                                               |

 45-1 Ramsey Road, Shirley, NY 11967, USA

-80°C for 12 months.

**Storage buffer** Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.

**Reconstitution** Reconstitute in sterile PBS, pH7.2-pH7.4.

**Isoelectric Point** 7.8

## GENE INFORMATION

**Gene Name** Cflar CASP8 and FADD-like apoptosis regulator [ Mus musculus (house mouse) ]

**Official Symbol** Cflar

### Synonyms

Cflar; CASP8 and FADD-like apoptosis regulator; Cash; Flip; MRIT; CLARP; FLAME; Casper; Gm9845; c-Flip; FLAME-1; I-FLICE; 2310024N18Rik; A430105C05Rik; CASP8 and FADD-like apoptosis regulator; FADD-like antiapoptotic molecule 1; MACH-related inducer of toxicity; caspase homolog; caspase-eight-related protein; caspase-like apoptosis regulatory protein; cellular FLICE-like inhibitory protein; inhibitor of FLICE; usurpin

**Gene ID** 12633

**mRNA Refseq** NM\_001289704.3

**Protein Refseq** NP\_001276633.1

**UniProt ID** O35732
