

## Recombinant HCV/Genotype-5a NS3 Protein

**Cat. No.** NS3-1755H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                            |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | E.coli derived recombinant from HCV subtype 5a. The protein contains the full-length HCV NS3 (c33c) immunodominant region. |
| <b>Species</b>          | HCV                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                     |
| <b>Form</b>             | PBS, pH 7.4.                                                                                                               |
| <b>Purity</b>           | >95%                                                                                                                       |
| <b>Applications</b>     | WB standard, Ab ELISA, immunogen, etc.                                                                                     |
| <b>Storage</b>          | Store at -80 centigrade, Avoid freeze / thaw cycle.                                                                        |
| <b>Concentration</b>    | 1mg/mL                                                                                                                     |
