

## Recombinant H9N2 (A/Guinea fowl/HK/WF10/99) HA ( $\Delta$ TM) Protein, His-tagged

Cat. No. HA-1918H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                            |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | C-terminal 6xHis tagged HA( $\Delta$ TM) (H9N2/Guinea fowl/Hong Kong/WF10/99)(a.a.18-530)(Genebank No. AAO46082)) was expressed in HEK293. |
| Species          | H9N2                                                                                                                                       |
| Source           | HEK293                                                                                                                                     |
| ProteinLength    | 18-530 a.a.                                                                                                                                |
| Form             | PBS, pH 7.4.                                                                                                                               |
| Purity           | >95%                                                                                                                                       |
| Applications     | WB standard, antibody ELISA, immunogen                                                                                                     |
| Storage          | Store at -80 centigrade, Avoid freeze / thaw cycle.                                                                                        |
| Concentration    | 1mg/mL                                                                                                                                     |
