

Caspase-7 Immunoassay Kit (Fluorometric)

Cat. No. Kit-2304 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Caspases play a key role in apoptosis. The CaspSELECT; Caspase-7 Immunoassay Kit provides an effective immunosorbent enzyme assay for the specific, quantitative detection of caspase-7 activity in microtiter plates. The assay utilizes caspase-7 polyclonal antibody to capture activated caspase-7 from cell lysates. Substrate DEVD-AFC is then added that is cleaved proportionally to the amount of activated caspase-7 in the cell lysate. The cleavage generates free AFC which is then analyzed fluorometrically (Ex./Em. = 400/505 nm) using a fluorescence plate reader. The assay ensures absolute specific detection of caspase-7. Other known caspases and non-specific proteases are not detected.
Applications	Effective immunosorbent enzyme assay for specific, quantitative detection of caspase-7 activity in microtiter plates.
Storage	-20°C
Shipping	Gel Pack
Size	100 assays
Kit Components	Cell Lysis Buffer; Coating Buffer; Anti-Caspase-7 Antibody (20X); Blocking Buffer; Incubation Buffer; DTT (1 M); DEVD-AFC Substrate (1 mM); Positive Control (rh-Caspase-7); Microtiter Plate; Adhesive Plate Cover
Target Species	Mammalian

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Detection method	Fluorescence(Ex/Em 370-425/ 490-525nm)
Features & Benefits	Simple one-step procedure; takes only 2-4 hours; Fast and convenient
