Recombinant Human MMD Protein, GST-tagged

Cat. No. MMD-5406H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human MMD full-length ORF (NP_036461.2, 1 a.a. - 238 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This protein is expressed by in vitro differentiated macrophages but not freshly isolated monocytes. Although sequence analysis identifies seven potential transmembrane domains, this protein has little homology to G-protein receptors and it has not been positively identified as a receptor. A suggested alternative function is that of an ion channel protein in maturing macrophages. [provided by RefSeq
