| <b>Description</b>      | Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 39S subunit protein. A pseudogene corresponding to this gene is found on chromosome 5q. [provided by RefSeq] |
| <b>Molecular Mass</b>   | 54.45 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

TTLLDQYIREQREKDSVMSANGKPDPTVPDS

#### Applications

Enzyme-linked Immunoabsorbent Assay  
Western Blot (Recombinant protein)  
Antibody Production  
Protein Array

#### Notes

Best use within three months from the date of receipt of this protein.

#### Storage

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

#### Storage Buffer

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

### GENE INFORMATION

#### Gene Name

[MRPL10 mitochondrial ribosomal protein L10 \[ Homo sapiens \]](#)

#### Official Symbol

[MRPL10](#)

#### Synonyms

MRPL10; mitochondrial ribosomal protein L10; 39S ribosomal protein L10, mitochondrial; 39S ribosomal protein L10; mitochondrial; L10MT; MGC17973; MRP L8; MRP L10; MRPL8; RPML8; L8mt; 39S ribosomal protein L8, mitochondrial; MRP-L8; MRP-L10;
