

Recombinant Human MRVI1 Protein

Cat. No. MRVI1-5631H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human MRVI1 full-length ORF (ADR83074.1) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	This gene is similar to a putative mouse tumor suppressor gene (Mrvi1) that is frequently disrupted by mouse AIDS-related virus (MRV). The encoded protein, which is found in the membrane of the endoplasmic reticulum, is similar to Jaw1, a lymphoid-restricted protein whose expression is downregulated during lymphoid differentiation. Studies in mouse suggest that MRV integration at Mrvi1 induces myeloid leukemia by altering the expression of a gene important for myeloid cell growth and/or differentiation, and thus this gene may function as a myeloid leukemia tumor suppressor gene. Several alternatively spliced transcript variants encoding different isoforms have been found for this gene, few of which initiate translation at a non-AUG (CUG) start site. [provided by RefSeq]
Form	Liquid
Molecular Mass	65.7 kDa

Applications

Antibody Production
 Functional Study
 Compound Screening

Usage

Heating may cause protein aggregation. Please do not heat this product before electrophoresis.

Notes

Best use within three months from the date of receipt of this protein.

Storage

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

Storage Buffer

25 mM Tris-HCl of pH8.0 containing 2% glycerol.

GENE INFORMATION

Gene Name

MRVI1 murine retrovirus integration site 1 homolog [Homo sapiens]

Official Symbol

MRVI1

Synonyms

MRVI1; murine retrovirus integration site 1 homolog; protein MRVI1; inositol 1; 4; 5 triphosphate associated cGMP kinase substrate; IP3R associated cGMP kinase substrate; IRAG; JAW1L; JAW1-related protein MRVI1; IP3R-associated cGMP kinase substrate; inositol 1,4,5-triphosphate receptor-associated cGMP kinase
