

Recombinant Human MSL3 Protein, GST-tagged

Cat. No. MSL3-5657H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human MSL3L1 full-length ORF (AAH31210.1, 1 a.a. - 521 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a nuclear protein and has similarity to drosophila male-specific lethal-3 gene. The drosophila protein plays a critical role in a dosage-compensation pathway, which equalizes X-linked gene expression in males and females. Thus this encoded protein is thought to play a similar function in chromatin remodeling and transcriptional regulation. This gene has been found to undergo X inactivation. There are four alternatively spliced transcript variants of this gene encoding different isoforms. [provided by RefSeq]
