

Recombinant Human MYO9A Protein, GST-tagged

Cat. No. MYO9A-5846H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human MYO9A full-length ORF (AAH60886.1, 1 a.a. - 729 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a member of the myosin superfamily. The protein represents an unconventional myosin; it should not be confused with the conventional non-muscle myosin-9 (MYH9). Unconventional myosins contain the basic domains of conventional myosins and are further distinguished from class members by their tail domains. They function as actin-based molecular motors. Mutations in this gene have been associated with Bardet-Biedl Syndrome. [provided by RefSeq, Dec 2011]
