

Recombinant Human Killer Cell Lectin-Like Receptor Subfamily C, Member 3, His-tagged

Cat. No. KLRC3-7170H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human KLRC3 protein, fused to His-tag at N-terminus, was expressed in E. coli. MW: 19 kDa.
Species	Human
Source	E.coli
ProteinLength	94-240aa
Description	KLRC3 is a member of the NKG2 group which are expressed primarily in natural killer (NK) cells and encodes a family of transmembrane proteins characterized by a type II membrane orientation (extracellular C terminus) and the presence of a C-type lectin domain. The NKG2 gene family is located within the NK complex, a region that contains several C-type lectin genes preferentially expressed on NK cells.
Form	Liquid. In 20mM Tris-HCl buffer (pH 8.0) containing 0.4M NaCl, 10% glycerol.
