

# Recombinant Human NMB Protein, GST-tagged

**Cat. No.** NMB-5922H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human NMB full-length ORF ( AAH08603, 25 a.a. - 121 a.a.) recombinant protein with GST-tag at N-terminal.                                                                                                                                                                                                                                                                                                                                         |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Source</b>           | Wheat Germ                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Description</b>      | This gene encodes a member of the bombesin-like family of neuropeptides, which negatively regulate eating behavior. The encoded protein may regulate colonic smooth muscle contraction through binding to its cognate receptor, the neuromedin B receptor (NMBR). Polymorphisms of this gene may be associated with hunger, weight gain and obesity. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2015] |
| <b>Molecular Mass</b>   | 36.41 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                         |

 45-1 Ramsey Road, Shirley, NY 11967, USA

**Storage** Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

**Storage Buffer** 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name** NMB neuromedin B [ Homo sapiens ]

**Official Symbol** NMB

**Synonyms** NMB; neuromedin B; neuromedin-B; MGC2277; MGC3936; MGC17211;

**Gene ID** 4828

**mRNA Refseq** NM\_021077

**Protein Refseq** NP\_066563

**MIM** 162340

**UniProt ID** P08949

**Quality Control Testing:**
