

# Recombinant Cynomolgus Monkey CCL5 Protein

**Cat. No.** CCL5-4397C    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Cynomolgus Monkey CCL5 Protein (68aa) was expressed in yeast.                                           |
| <b>Species</b>          | Cynomolgus                                                                                                          |
| <b>Source</b>           | Yeast                                                                                                               |
| <b>ProteinLength</b>    | 68aa                                                                                                                |
| <b>Form</b>             | Lyophilized                                                                                                         |
| <b>Molecular Mass</b>   | 7.8 kDa                                                                                                             |
| <b>AA sequence</b>      | SPHASDTPPC CFAYIARPLP RAHIKEYFYT SGKCSNPAVV FVTRKNRQVC<br>ANPEKKWVRE YINSLEMS (68)                                  |
| <b>Purity</b>           | >95% as visualized by SDS-PAGE analysis.                                                                            |
| <b>Applications</b>     | This endotoxin-free recombinant protein can be used in cell culture, ELISA Standard, and as a Western Blot Control. |
| <b>Storage</b>          | Store at -20 centigrade.                                                                                            |

## GENE INFORMATION

|                  |                                                                                        |
|------------------|----------------------------------------------------------------------------------------|
| <b>Gene Name</b> | CCL5 C-C motif chemokine ligand 5 [ <i>Macaca fascicularis</i> (crab-eating macaque) ] |
