

# Recombinant Full Length Human PTPN5 Protein, MYC/DDK-tagged

**Cat. No.** PTPN5-723H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human PTPN5 Protein was expressed in HEK293 with C-terminal MYC/DDK tag. |
| <b>Species</b>          | Human                                                                                |
| <b>Source</b>           | HEK293                                                                               |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                |
| <b>Molecular Mass</b>   | 63.4 kDa                                                                             |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                     |

## GENE INFORMATION

|                        |                                                                                              |
|------------------------|----------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | PTPN5 protein tyrosine phosphatase, non-receptor type 5 (striatum-enriched) [ Homo sapiens ] |
| <b>Official Symbol</b> | PTPN5                                                                                        |
| <b>Synonyms</b>        | PTPN5; protein tyrosine phosphatase, non-receptor type 5 (striatum-enriched); PTPSTEP; STEP; |
| <b>Gene ID</b>         | 5776                                                                                         |
