

Recombinant Human CLEC11A Protein, T7-His-TEV-tagged

Cat. No. CLEC11A-001H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Full-length extracellular domain of human CLEC11A cDNA (22 – 323 aa, derived from BC005810) was constructed with codon optimization and expressed with a small T7-His-TEV cleavage site Tag (29aa) fusion at its N-terminal. This protein is expressed in E.coli as inclusion bodies. The final product was refolded and chromatographically purified.
Species	Human
Source	E.coli
Description	This gene encodes a member of the C-type lectin superfamily. The encoded protein is a secreted sulfated glycoprotein and functions as a growth factor for primitive hematopoietic progenitor cells. An alternative splice variant has been described but its biological nature has not been determined.
