

Neuraminidase Assay Kit

Cat. No. Kit-2420 **Lot. No.** (See product label)

SPECIFICATION

Product Overview

NEURAMINDASE (also known as Sialidase) is an enzyme that hydrolyzes terminal sialic acid residues on poly-saccharide chains. It is predominantly expressed in microorganisms such as bacteria and viruses. Cleavage of sialic acid residues by neuraminidase is believed to play several roles in infection by influenza viruses. It is thought to assist in the penetration of mucosal linings, the invasion of target cells, the elution of progeny viruses from infected cells, and the prevention of self-aggregation. Thus, neuraminidase is an important target for influenza drug development and simple, direct and automation-ready procedures for measuring neuraminidase activity find wide applications in research and drug discovery. neuraminidase assay measures the sialic acid released by neuraminidase in one step. The change in color intensity of the reaction product at 570nm or fluorescence intensity at $\lambda_{ex}/\lambda_{em} = 530/585\text{nm}$ is directly proportional to neuraminidase activity in the sample.

Storage -20°C

Shipping On Ice

Size 100 tests

Detection method OD570nm, or FL530/585nm

Compatible Sample Types Biological

Features & Benefits Sensitive and accurate. Linear detection range at 37°C in 96-well plate: 0.1 to 10 U/L

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

for colorimetric assays and 0.01 to 2 U/L for fluorimetric assays.

Simple and convenient. Homogeneous assay requiring only two absorbance measurements. Assay can be completed in 60 min.

High-throughput. Can be readily automated as a high-throughput 96-well plate assay to screen thousands of samples per day.

Assay time	60 min
Sensitivity	OD, FL: 1, 0.01U/L
