

Glutamine Assay Kit

Cat. No. Kit-2520 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Glutamine is an amino acid synthesized in the muscle that plays major roles in protein synthesis, acid-base balance, anabolic processes and is utilized for cellular energy and as a carbon source. It is used in treatment of injury, trauma, burns, and also as a supplement for muscle growth and post-surgery healing. Simple, direct and automation-ready procedures for measuring glutamine concentration are very desirable. glutamine assay kit is based on hydrolysis of glutamine to glutamate and colorimetric determination of the product. The intensity of the product color, measured at 565 nm, is proportional to the glutamine concentration in the sample.
Storage	-20°C
Shipping	On Ice
Size	100 tests
Detection method	OD565nm
Compatible Sample Types	Serum, plasma, urine, cell, tissue etc
Features & Benefits	Sensitive and accurate. Use 20 µL sample. Linear detection range 0.023 - 2 mM glutamine in 96-well plate assay. Convenient. The procedure involves adding a single working reagent, incubation for 40 min at room temperature, adding a stop reagent and reading the optical density. No 37°C heater is needed.

 45-1 Ramsey Road, Shirley, NY 11967, USA

High-throughput. Can be readily automated as a high-throughput 96-well plate assay for thousands of samples per day.

Assay time	40 min
-------------------	--------

Sensitivity	23 μ M
--------------------	------------
