

## Recombinant Dengue virus serotypes 1-4 Envelope Protein

**Cat. No.** DENV-1-4-1038V    **Lot. No.** (See product label)

### SPECIFICATION

|                            |                                                                                                                |
|----------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>    | This is Recombinant Dengue virus type 1-4 Envelope Antigen which is expressed in E. coli and the mw. is 20 kDa |
| <b>Species</b>             | DENV                                                                                                           |
| <b>Source</b>              | E.coli                                                                                                         |
| <b>Antigen Description</b> | Fine Specificity: contains serotype common regions                                                             |
| <b>Molecular Mass</b>      | 20 kDa                                                                                                         |
| <b>Purity</b>              | SDS-PAGE~95%                                                                                                   |
| <b>Usage</b>               | ELISA & Lateral flow                                                                                           |
| <b>Storage</b>             | -20 C                                                                                                          |
| <b>Storage Buffer</b>      | PBS, pH 7.4                                                                                                    |
