

## Recombinant Hepatitis B virus pre-S1+S2 Protein

Cat. No. HBV-1046V Lot. No. (See product label)

### SPECIFICATION

|                            |                                                                                                                             |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>    | This is Recombinant Hepatitis B virus pre-S1+S2 Antigen which is expressed in E. coli with tag of His and the mw. is 21 kDa |
| <b>Species</b>             | HBV                                                                                                                         |
| <b>Source</b>              | E.coli                                                                                                                      |
| <b>Antigen Description</b> | Fine Specificity: a.a. #1- a.a. #174 of adw pre-S1 region                                                                   |
| <b>Molecular Mass</b>      | 21 kDa                                                                                                                      |
| <b>Purity</b>              | SDS-PAGE~95%                                                                                                                |
| <b>Usage</b>               | ELISA                                                                                                                       |
| <b>Storage</b>             | Aliquot & freeze ( $\leq -20$ centigrade)                                                                                   |
| <b>Storage Buffer</b>      | PBS, pH 7.2                                                                                                                 |
