

# Recombinant Mycobacterium tuberculosis Heat shock Protein

**Cat. No.** hspX-1077b    **Lot. No.** (See product label)

## SPECIFICATION

|                            |                                                                                                                       |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>    | This is Recombinant Mycobacterium tuberculosis Heat shock protein which is expressed in E. coli and the mw. is 70 kDa |
| <b>Species</b>             | M.tuberculosis                                                                                                        |
| <b>Source</b>              | E.coli                                                                                                                |
| <b>Antigen Description</b> | Fine Specificity: full length                                                                                         |
| <b>Molecular Mass</b>      | 70 kDa                                                                                                                |
| <b>Purity</b>              | SDS-PAGE~95%                                                                                                          |
| <b>Usage</b>               | ELISA                                                                                                                 |
| <b>Storage</b>             | Aliquot & freeze ( $\leq -20$ centigrade)                                                                             |
| <b>Storage Buffer</b>      | PBS, pH 7.4                                                                                                           |
