Native Feline Parvovirus Antigen

Cat. No. Pa-27F **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Inactivation: Photochemical and detergent treated
Species	Feline
Source	CRFK cells
Description	Parvovirus is the common name applied to all the viruses in the Parvoviridae taxonomic family. The Parvoviridae family has two subfamilies; the Parvovirinae (vertebrate viruses) and the Densovirinae (invertebrate viruses). Different examples can be given for the subfamily Parvovirinae, but the most common is Dependovirus spp., which only work with a helper virus such as adenovirus. Other viruses that can infect without helper viruses are called as autonomous parvoviruses.
Form	Liquid
Applications	ELISA
Notes	This product is intended for research and manufacturing uses only. It is not a diagnostic device. The user assumes all responsibility for care, custody and control of the material, including its disposal, in accordance with all regulations.
Storage	≤ -70centigrade
Storage Buffer	50 mM Glycine, pH 9 with 140 mM NaCl, <0.1% CHAPS and <0.01% SDS
