

Active Recombinant Human GCK Protein, His-tagged

Cat. No. GCK-005H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human Hexokinase4, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
Description	Hexokinase is the first enzyme in the glycolytic pathway, catalyzing the transfer of a phosphoryl group from ATP to glucose to form glucose-6-phosphate and ADP. In mammals, four distinct enzymes-types 1 to 4 hexokinases-have been identified. The enzyme is found in most cells, but there is tissue specificity for the particular type of hexokinase. Hexokinase4 is found in the liver and pancreatic beta-cells, where it is controlled by insulin (activation) and glucagon (inhibition). In pancreatic beta-cells, type IV enzyme acts as a glucose sensor to modify insulin secretion. Hexokinase4 is commonly called 'glucokinase'.
Form	Liquid
Bio-activity	Specific activity is > 2,000 pmol/min/μg. One unit will convert 1 pmoles of D-Glucose to D-Glucose-6-phosphate per minute at pH8.0 at 37 centigrade.
Molecular Mass	54.3 kDa (485aa)
AA Sequence	MGSSHHHHHSSGLVPRGSHMLDDRARMEAAKKEKVEQILAEFQLQEEDLKKVMR RMQKEMDRGLRLETHEEASVKMLPTYVRSTPEGSEVGDFLSLDLGGTNFRVMLVK

Endotoxin < 1.0 EU per 1µg of protein (determined by LAL method)

Purity > 95% by SDS-PAGE

Notes For research use only. This product is not intended or approved for human, diagnostics or veterin.

Storage Can be stored at +4 centigrade short term (1-2 weeks). For long term storage, aliquot and store at -20 or -70 centigrade.
Avoid repeated freezing and thawing cycles.

Concentration 1 mg/mL (determined by Bradford assay)

Storage Buffer In 20 mM Tris-HCl buffer (pH 8.0) containing 10% glycerol

GENE INFORMATION

Gene Name GCK glucokinase [Homo sapiens (human)]

Official Symbol GCK

Synonyms Hexokinase type IV; Glucokinase; GCK; GK; GLK; HK4; HHF3; HKIV; HXKP; LGLK; MODY2; FGQTL3; glucokinase; ATP:D-hexose 6-phosphotransferase; HK IV;
