

Recombinant HIV-2 (Rod) gp36 Envelope Protein

Cat. No. HIV2(Rod)gp36-133H **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	HIV
Source	E.coli
Description	Truncated Recombinant HIV-2 envelope protein gp36 produced as a fusion protein in the E.coli Expression System. Truncated gp36 protein mol.wt: 28kD. This protein binds to murine anti-gp36 HIV-2 monoclonal antibodies and HIV-2 converted human serum polyclonal antibodies in ELISA and Western ELISA.
Form	Frozen Liquid
Molecular Mass	28 kD
Purity	> 98 % by SDS-PAGE
Applications	Human Diagnostics; Immunization; T-Cell Activation.
Notes	Recommended concentrations for use are approximate values. A dose dependent response assay should be performed to determine the optimal concentration for use in specific applications. ELISA and Western ELISA require 10-100ng protein depending on the nature and

affinity of the detection reagent. Human serum polyclonal antibodies yield titers of 1:1000 or greater at 100ng of immobilized protein under standard ELISA conditions.

Stability	At least 24 months at -75 centigrade.
------------------	---------------------------------------

Storage	Store at -75 centigrade.
----------------	--------------------------

Dilutions	10 mM Tris, pH 8.0, SDS (<0.01%)
------------------	----------------------------------
