

Recombinant Human CHGA Protein, His-tagged

Cat. No. CHGA-412H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CHGA Protein is produced by E.coli expression system. This protein is fused with a His tag.
Species	Human
Source	E.coli
ProteinLength	19-457 aa
Description	Chromogranin A is a member of the chromogranin/secretogranin (granins) family of neuroendocrine secretory proteins. Chromogranin A (CgA) represents the major soluble protein co-stored and co-released with catecholamines, within chromaffin cells secretory granules. Chromogranin A is the precursor to several functional peptides including vasostatin, pancreastatin, catestatin and parastatin. It is considered a diagnostic and prognostic marker of several diseases, including a variety of tumours and cardiac heart failure. Recombinant human Chromogranin A, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
