

Recombinant Full Length Human POT1 Protein, Isoform 1, Flag-tagged

Cat. No. POT1-2788H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human POT1 Protein is produced by HEK293T expression system. This protein is fused with a Flag tag.
Species	Human
Source	HEK293
ProteinLength	1-634 a.a.
Description	This gene is a member of the telombin family and encodes a nuclear protein involved in telomere maintenance. Specifically, this protein functions as a member of a multi-protein complex that binds to the TTAGGG repeats of telomeres, regulating telomere length and protecting chromosome ends from illegitimate recombination, catastrophic chromosome instability, and abnormal chromosome segregation. Increased transcriptional expression of this gene is associated with stomach carcinogenesis and its progression. Alternatively spliced transcript variants have been described.
Form	PBS buffer
