

Recombinant Human SRPRB Protein, Flag-tagged

Cat. No. SRPRB-2257H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SRPRB Protein is produced by HEK293T expression system. This protein is fused with a Flag tag.
Species	Human
Source	HEK293
Description	The protein encoded by this gene has similarity to mouse protein which is a subunit of the signal recognition particle receptor (SR). This subunit is a transmembrane GTPase belonging to the GTPase superfamily. It anchors alpha subunit, a peripheral membrane GTPase, to the ER membrane. SR is required for the cotranslational targeting of both secretory and membrane proteins to the ER membrane.
