

Recombinant Human PRND, His-tagged

Cat. No. PRND-7224H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human PRND protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
description	PRND is a membrane glycosylphosphatidylinositol-anchored glycoprotein that is found predominantly in testis. This protein is expressed during embryogenesis, but is expressed minimally in the central nervous system. Its function is still unknown. Mutations in PRND may lead to neurological disorders.
