

Recombinant Rhesus Macaque MAPT Protein (2-459 aa), His-SUMO-tagged

Cat. No. MAPT-646R **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Rhesus Macaque MAPT Protein (2-459 aa) is produced by E. coli expression system. This protein is fused with a 6xHis-SUMO tag at the N-terminal. Protein Description: Full Length of Mature Protein.
Species	Rhesus macaque
Source	E.coli
ProteinLength	2-459 aa
Description	Promotes microtubule assbly and stability, and might be involved in the establishment and maintenance of neuronal polarity. The C-terminus binds axonal microtubules while the N-terminus binds neural plasma mbrane components, suggesting that tau functions as a linker protein between both. Axonal polarity is predetermined by tau localization (in the neuronal cell) in the domain of the cell body defined by the centrosome. The short isoforms allow plasticity of the cytoskeleton whereas the longer isoforms may preferentially play a role in its stabilization.
Form	Tris-based buffer, 50% glycerol
Molecular Mass	63.8 kDa
AA Sequence	AEPRQEFDVMEDHAGTYGLGDRKDQEGYTMLQDQEGD TDAGLKESPLQTPAEDG SEELGSETSDAKSTPTAEDVTAPLVDERAPGEQAAAQPHMEIPEGTTAEEAGIGDTP

Purity > 90% as determined by SDS-PAGE.

Notes Repeated freezing and thawing is not recommended. Store working aliquots at 4 centigrade for up to one week.

Storage The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20 centigrade/-80 centigrade. The shelf life of lyophilized form is 12 months at -20 centigrade/-80 centigrade.

Concentration A hardcopy of COA with concentration instruction is sent along with the products.
