

Recombinant Human HIST1H2BC Protein (2-125 aa), GST-tagged

Cat. No. HIST1H2BC-1184H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human HIST1H2BC Protein (2-125 aa) is produced by E. coli expression system. This protein is fused with a GST tag at the N-terminal. Research Area: Epigenetics and Nuclear Signaling. Protein Description: Partial.
Species	Human
Source	E.coli
ProteinLength	2-125 aa
Description	Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a tplate. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome rodeling.Has broad antibacterial activity. May contribute to the formation of the functional antimicrobial barrier of the colonic epithelium, and to the bactericidal activity of amniotic fluid.
Form	Tris-based buffer,50% glycerol
Molecular Mass	40.6 kDa
AA Sequence	PEPAKSAPAPKKGSKKAVTKAQKKDGKKRKRSRKESYSVYVYKVLKQVHPDTGISS

 45-1 Ramsey Road, Shirley, NY 11967, USA

	KAMGIMNSFVNDIFERIAGEASRLAHYNKRSTITSREIQTAVRLLPGELAKHAVSEGT KAVTKYTSS
Purity	> 90% as determined by SDS-PAGE.
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4 centigrade for up to one week.
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20 centigrade/-80 centigrade. The shelf life of lyophilized form is 12 months at -20 centigrade/-80 centigrade.
Concentration	A hardcopy of COA with reconstitution instruction is sent along with the products. Please refer to it for detailed information.

GENE INFORMATION

Gene Name	HIST1H2BC histone cluster 1 H2B family member c [Homo sapiens (human)]
Official Symbol	HIST1H2BC
Synonyms	H2B.1; H2B/l; H2BFL; dJ221C16.3;
Gene ID	8347
mRNA Refseq	NM_003526
Protein Refseq	NP_003517
UniProt ID	P62807
