

## Recombinant Human CCNJL Protein (315-435 aa), His-tagged

**Cat. No.** CCNJL-1354H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                           |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human CCNJL Protein (315-435 aa) is produced by Yeast expression system. This protein is fused with a 6xHis tag at the N-terminal. Research Area: Cell Biology. Protein Description: Partial. |
| <b>Species</b>          | Human                                                                                                                                                                                                     |
| <b>Source</b>           | Yeast                                                                                                                                                                                                     |
| <b>ProteinLength</b>    | 315-435 aa                                                                                                                                                                                                |
| <b>Form</b>             | Tris-based buffer, 50% glycerol                                                                                                                                                                           |
| <b>Molecular Mass</b>   | 14.9 kDa                                                                                                                                                                                                  |
| <b>AA Sequence</b>      | MVPGTPPTPTQVLFPAYPALGQPATTLAQFQTPVQDLCLAYRDSLQAHRSGLL<br>SGSTGSSLHTPYQPLQPLDMCPVPVPASLSMHMAIAAEPRHCLATTYGSYFSGSH<br>MFPTGCFDR                                                                             |
| <b>Purity</b>           | > 90% as determined by SDS-PAGE.                                                                                                                                                                          |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4 centigrade for up to one week.                                                                                              |
| <b>Storage</b>          | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form                       |
