

## Recombinant Mouse MASP2 Protein (20-685 aa), His-tagged

**Cat. No.** MASP2-2795M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                           |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Mouse MASP2 Protein (20-685 aa) is produced by Baculovirus expression system. This protein is fused with a 6xHis tag at the N-terminal. Research Area: Cardiovascular. Protein Description: Partial.                                                                                                                                                          |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                                                                                                                     |

| <b>ProteinLength</b>    | 20-685 aa                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Description</b>      | Serum protease that plays an important role in the activation of the complement system via mannose-binding lectin. After activation by auto-catalytic cleavage it cleaves C2 and C4, leading to their activation and to the formation of C3 convertase (By similarity).                                                                                                   |
| <b>Form</b>             | Tris-based buffer, 50% glycerol                                                                                                                                                                                                                                                                                                                                           |
| <b>Molecular Mass</b>   | 75.4 kDa                                                                                                                                                                                                                                                                                                                                                                  |

**Purity** > 90% as determined by SDS-PAGE.

**Notes** Repeated freezing and thawing is not recommended. Store working aliquots at 4 centigrade for up to one week.

**Storage** The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20 centigrade/-80 centigrade. The shelf life of lyophilized form is 12 months at -20 centigrade/-80 centigrade.

**Concentration** A hardcopy of COA will be sent along with the products. Please refer to it for detailed information.

## GENE INFORMATION

**Gene Name** Masp2 mannan-binding lectin serine peptidase 2 [ *Mus musculus* ]

**Official Symbol** MASP2

**Synonyms** MASP2; mannan-binding lectin serine protease 2; MBL-associated serine protease 2; MASP19; MASP-2;

**Gene ID** 17175
