

## Natural Glycine max (soybean) glycinin gy6 protein

**Cat. No.** GY6-285S    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                  |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Natural Glycine max (soybean) glycinin gy6 protein was glycinin from soybean and purified from soybean flour by multi-step HPLC. |
| <b>Species</b>          | Glycine max                                                                                                                      |
| <b>Source</b>           | Glycinin from soybean                                                                                                            |
| <b>Form</b>             | Preservative-free and carrier-free in 1X PBS pH 7.40. Filtered through 0.22µm filter.                                            |
| <b>Molecular Mass</b>   | Multiple subunits ranging from 37-50 kDa.                                                                                        |
| <b>Purity</b>           | Purity > 95% by silver stained SDS-PAGE.                                                                                         |
| <b>Storage</b>          | (1) Store at -20°C. (2) Avoid freeze thaw cycles.                                                                                |
| <b>Warning</b>          | Allergens are provided for research and commercial use in vitro: not for human in vivo or therapeutic use.                       |
