

# Recombinant Juglans regia Pathogenesis related protein 10 (Jug r 5)

**Cat. No.** Jug r 5-872W    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>Product Overview</b> | Recombinant Juglans regia Pathogenesis related protein 10 (Jug r 5) was expressed in E.coli and purified by multi-step chromatographic purification.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Species</b>          | Juglans regia (English walnut)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| <b>Description</b>      | Pathogenesis-related (PR) proteins are proteins produced in plants in the event of a pathogen attack. They are induced as part of systemic acquired resistance. Infections activate genes that produce PR proteins. Some of these proteins are antimicrobial, attacking molecules in the cell wall of a bacterium or fungus. Others may function as signals that spread "news" of the infection to nearby cells. Infections also stimulate the cross-linking of molecules in the cell wall and the deposition of lignin, responses that set up a local barricade that slows spread of the pathogen to other parts of the plant. |
| <b>Form</b>             | Preservative-free and carrier-free in 0.2M L-Arginine, phosphate buffered saline, pH 7.4. Filtered through 0.22µm filter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Molecular Mass</b>   | 19 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Purity</b>           | Purity >95% by silver stained SDS-PAGE.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Storage</b>          | (1) Store at -20°C. (2) Avoid freeze thaw cycles.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
