

Recombinant Human TF Protein

Cat. No. TF-001H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human TF Protein without tag was expressed in Oryza Sativa.
Species	Human
Source	Oryza Sativa
Description	This gene encodes a glycoprotein with an approximate molecular weight of 76.5 kDa. It is thought to have been created as a result of an ancient gene duplication event that led to generation of homologous C and N-terminal domains each of which binds one ion of ferric iron. The function of this protein is to transport iron from the intestine, reticuloendothelial system, and liver parenchymal cells to all proliferating cells in the body. This protein may also have a physiologic role as granulocyte/pollen-binding protein (GPBP) involved in the removal of certain organic matter and allergens from serum.
Form	Pinkish to reddish-brown or orange-red powder or crystalline powder
Molecular Mass	76 kDa
Endotoxin	<0.5EU/mg
Purity	≥95%, RP-HPLC
Storage	Stored at 2-8°C.

Reconstitution

It is recommended to re-dissolve the OsrhTF powder in PBS. The sterile OsrhTF solution can be stored at 4°C for 12 months.

GENE INFORMATION

Gene Name TF transferrin [Homo sapiens]

Official Symbol TF

Synonyms TF; transferrin; serotransferrin; PRO1557; PRO2086; siderophilin; beta-1 metal-binding globulin; TFQTL1; DKFZp781D0156;

Gene ID 7018

mRNA Refseq NM_001063

Protein Refseq NP_001054

MIM 190000

UniProt ID P02787

 Tel: 1-631-559-9269 1-516-512-3133
