

Recombinant Human OTU Domain, Ubiquitin Aldehyde Binding 1

Cat. No. OTUB1-482H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant OTUB1 protein was expressed in <i>E.coli</i> and purified by using conventional chromatography techniques. MW = 33.4 kDa (291aa).
Species	Human
Source	<i>E.coli</i>
Description	Otubain 1, also known as OTUB1, is a member of the OUT (ovarian tumor) superfamily of predicted cysteine proteases and inhibits cytokine gene transcription in the immune system via its interaction with a ubiquitin protease and E3 ubiquitin ligase. This protein is a highly specific ubiquitin iso-peptidase, and cleaves ubiquitin from branched poly-ubiquitin chains but not from ubiquitinated substrates. It is proposed to function in specific ubiquitin-dependent pathways, possibly by providing an editing function of polyubiquitin chain growth.
